APhA's Delivering Medication Therapy Management Services certificate training program (3rd Edition) presents a systematic approach for developing, implementing, delivering, and sustaining MTM services. It includes an overview of the marketplace for delivering MTM services, guidance for implementing MTM services in pharmacy practice, a review of the essential skills and knowledge needed for performing MTM successfully, and an organized process for identifying medication-related problems. The purpose of this certificate training program is to prepare pharmacists to improve medication use through the delivery of MTM services in a variety of practice settings.

The goals of this program are to:

- Advance public health and patient care through improved medication use
- Provide training to enhance pharmacists' ability to effectively provide MTM services
- Motivate increased numbers of pharmacists to establish MTM services
- Communicate benchmark practices for providing MTM services

APhA's Delivering Medication Therapy Management Services certificate training program has three components: online interactive self-study with assessment; the live seminar with online evaluation; and post-seminar case exercise. A Certificate of Achievement will be awarded to participants who successfully complete all program components, including an evaluation.

Key Learning Objectives of the Live Training Seminar

At the completion of this activity, the participant will be able to:

- Conduct a thorough medication therapy review (MTR)
- When interviewing a patient, employ effective communication skills to overcome communication barriers
- Complete a personal medication record (PMR)
- Develop a medication-related action plan (MAP)
- Document medication therapy management (MTM) services in a manner that allows for evaluating patient progress, billing, and tracking clinical and financial outcomes
- Create a plan for patient follow-up
- Assess patient-specific data and issues, and interpret these findings to identify medication-related problems
- Develop a patient problem list and a list of the patient's medication-related problems

- Establish goals of therapy for each medical condition and medication-related problem identified
- Make recommendations for resolving situations in which a patient's medications are potentially inappropriate
- Discuss the elements of an effective medication therapy recommendation to another health care practitioner
- Describe the medication use concerns and adverse drug events that are more common in elderly patients
- Account for pharmacokinetic and pharmacodynamic changes when reviewing an elderly person's medication regimen
- List important considerations when determining the operations of an MTM service
- Identify potential payers for MTM services
- Explain how to bill for MTM services using CPT codes
- Describe strategies for marketing MTM services
- Describe emerging opportunities for delivering MTM services

For a complete list of learning objectives and for all APhA accreditation information and policies, please visit APhA's website, <http://www.pharmacist.com/delivering-medication-therapy-management-services>.

Seminar Agenda

- Check-in and Continental Breakfast
- Welcome, Introductions and Acknowledgements
